MiniMed® 640G System

A breakthrough in diabetes management that thinks about how to protect your child from highs and lows and helps make daily care easier for you.

it thinks About your child’s health

You can’t always be with your child, but the MiniMed® 640G can.

Being the parent of a child with diabetes is a 24/7 responsibility. The MiniMed® 640G System features technology that helps you help your child achieve better glucose control.

ADVANCED PROTECTION WITH SMARTGUARD™ TECHNOLOGY
Automatically suspends insulin delivery before your child goes low to help prevent serious hypoglycaemic events.

24-HOUR GLUCOSE MONITORING WITH ENLITE™ SENSOR
Accurately and comfortably monitors glucose levels 24 hours a day, so you know where your child’s glucose level is and where it is going.

it thinks About you

You have a lot to think about, and we can help.

We designed MiniMed® 640G with a lot of help from parents of children with diabetes. We’ve included features to help enhance diabetes management.

PRECISE INSULIN DELIVERY
Allows both basal and bolus insulin doses as fine as 0.025 units to help meet your child’s sensitive insulin needs.

BOLUS WIZARD™ CALCULATOR
Automatically determines the bolus amount your child needs to help prevent dosing mistakes.

REMOTE CONTROL BOLUSING
Allows you to give a manual insulin dose from a few metres away and lets your child discreetly take insulin without interrupting daily activities.

it thinks About you

You have a lot to think about, and we can help.

We designed MiniMed® 640G with a lot of help from parents of children with diabetes. We’ve included features to help enhance diabetes management.

FRIENDLY TREATMENT REMINDERS
Helps your child even when you are not around to remind them to take insulin before lunch or check blood sugars before or after school activities.

MEDTRONIC CARELINK® PERSONAL
Accurately records and organises your child’s glucose levels online into a digital logbook and simple-to-read reports.

PRE-SET BOLUS
Allows you to program an insulin dose that your child can easily access later and take with meals.

CHILD SAFETY LOCK
Protects key functions with an access code to help prevent young children from accidentally giving themselves a bolus or changing settings.

ACTIVE DESIGN
- Colour screen
- Scratch resistant
- Waterproof to 3.6 metres for 24 hours
- Five expressive colour accents
it thinks
About your child’s day
Now there’s a predictable treatment for your child’s unpredictable day.

Understanding your child’s changing needs throughout the day takes time and effort. Now there’s a system that can keep up.

Manage your child’s diabetes with technology that thinks. Talk to your doctor to get started.
