I have diabetes

If my behavior is peculiar, if I appear intoxicated, or if I am unconscious, it may be a result of severe low blood sugar.

I am not intoxicated Call for medical assistance

If I am awake and able to swallow, give me a source of sugar (for example: juice, candy, or non-diet soft drink). Do not try to give me food or drink if I am unconscious.

Healthcare professionals

I wear an insulin pump.

- The pump delivers rapid-acting insulin at a constant rate.
- Press any button to wake up the pump.
- To stop insulin delivery on the pump:
 - From the home screen, press ^ to go to status screen.
 - Press © to **Suspend All Delivery**.
 - Press > to highlight **Yes**.
 - Press © to suspend all insulin delivery.
- **Do not** remove the pump battery.
- **Do not** remove the pump without medical consent.
- If the pump sounds an alarm, follow the instructions on the pump screen or contact a local Medtronic support representative for further assistance.

Airport information

I wear a required medical device prescribed by my physician.

Medtronic

Airport security

- The pump **must not** go through the x-ray machine that is used for carry-on or checked luggage.
- The full body scanner is also a form of x-ray. The insulin pump and CGM device should not go through the full body scanner. Do not remove your insulin pump or CGM devices. You should request an alternative screening method. You may need a letter from your healthcare provider in support of your request.
- The insulin pump, infusion set, reservoir, and CGM system can withstand exposure to airport metal detectors used at airport security checkpoints.

In flight

The MiniMed™ 780G insulin pump and system devices are suitable for use in aircraft. When flying in an aircraft, it is important to keep the pump connected to the body and check blood glucose levels frequently.
