## INTRODUCING THE TECH UPGRADE CGM SUBSCRIPTION FROM MEDTRONIC

## HOW SMARTGUARD™ WORKS

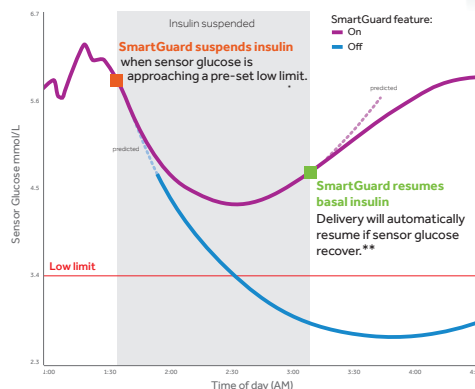

In Australia you generally get access to new technology every four to five years (via private health insurance). But our latest technology doesn't always come in four-year cycles; and because we don't want you to wait for access to what's new, we've created a special plan. It's called a Technology Upgrade CGM Subscription.

## WE'VE DESIGNED AN UPGRADE PLAN FOR PEOPLE LIVING WITH T1D AGED SEVEN+

- 1 New to Medtronic CGM Subscriptions?
- 2 Under 21 and can access the NDSS CGM Initiative?
- 3 Current Medtronic CGM subscriber?

You don't just get access to the latest in pump technology now, you will also be able to access the next generation of therapy once it is available in Australia.

With this Continuous Glucose Monitoring (CGM) subscription, you get the very latest in Medtronic insulin pump therapy with SmartGuard™ now. Our MiniMed® 640G System<sup>1</sup> is the first one in Australia that predicts you reaching your low-level setting 30 mins before it happens and suspends basal insulin so you can prevent hypos<sup>^</sup>.

\*SmartGuard Technology is activated when the MiniMed 640G is paired with continuous glucose monitoring. \*The dynamic suspend feature is based on certain criteria: sensor glucose must be within 3.9mmol/L of the low limit and predicted to be 1.1mmol/L above the low limit within 30 minutes AND the pump must not be in the refractory period. \*\*The dynamic resume feature is based on certain preset criteria: sensor glucose must be 1.1mmol/L above the preset low limit and predicted to be 2.2mmol/L above within 30 minutes AND insulin must have been suspended for at least 30 minutes.

## MEDTRONIC BRIDGING THE GAP PROGRAM MINIMED 640G

## PROTECTING YOUR HEALTH OUTCOMES TODAY

The MiniMed 640G System<sup>1</sup> discreetly fits in with your lifestyle with its waterproof design and remote bolus for snacks.

Improved HbA1c<sup>2</sup>  
Improved glycaemic  
variability<sup>3</sup>

## PROTECTING YOUR QUALITY OF LIFE

If you don't currently own a MiniMed 640G but are interested in accessing Medtronic's next generation of therapy once it launches in Australia, you can apply for a loan pump via our 'Bridging The Gap Program'. You can loan the MiniMed 640G until either your waiting period ends or your MM640G loan is replaced with the loan of the next therapy Medtronic launches in Australia. The upgrade can only be accessed by those who have purchased one of the three 'Tech Upgrade CGM Subscriptions' available.

Upon completion of the health fund waiting period, or when your current pump is out of warranty - you will be required to return the loan pump to Medtronic. You can then use your health cover to purchase the Medtronic pump that is compatible with the Medtronic CGM you are using at that time.

For further information go to [www.medtronic-diabetes.com.au](http://www.medtronic-diabetes.com.au) and search 'Bridging the Gap'.

## NEW TO MEDTRONIC CONTINUOUS GLUCOSE MONITORING SUBSCRIPTIONS?

The NDSS CGM initiative only covers Australians with Type 1 Diabetes who are aged under 21 – so we offer CGM subscriptions to everyone over this age. Over time these offer big savings in comparison to the recommended retail price of both G2® transmitters and Enlite® sensors.

If you have a MiniMed 640G pump, you may have trialled our Continuous Glucose Monitoring with the CGM Protector Kit. If you have not trialled Medtronic CGM you need to meet with your Diabetes Educator to ensure CGM is right for you.

Our subscriptions give you the option of receiving the G2 Transmitter at either the beginning or the end of the 12 months. When you speak to us, just let the Diabetes Therapy Consultant know if you currently own a G2 transmitter within its one-year warranty.

### WHY DO I NEED CGM?

Our current pump requires CGM to give you full system functionality. Medtronic are committed to advancing this technology and all future generations of Medtronic diabetes therapies will need compatible CGM to realise the benefits. (The transmitter and sensors are sold separately because insulin pumps may be covered by private health insurance).

### PROTECTING YOU AGAINST HYPOS

The MiniMed® 640G System<sup>3</sup> is the first system that offers advanced protection from lows with predictive low glucose management technology, especially throughout the night.

### WHAT ARE THE COSTS?

- You can buy a 12 month Tech Upgrade CGM Subscription for \$350/month via our eshop.
- All future tech upgrades will require the use of CGM technology - just as the MiniMed 640G does today.
- Your subscription is for the period of a year. You will receive the Tech Upgrade within six months of the end date, providing the technology is available in Australia.
- Terms and conditions apply.

## AGED SEVEN TO TWENTY AND CAN ACCESS THE NDSS CGM INITIAIVE?

The NDSS CGM initiative only covers Australians living with Type 1 Diabetes who are aged under 21 and meet specific criteria. If you have not trialled Medtronic CGM you need to meet with your Diabetes Educator to ensure CGM is right for you or your child. More information: [www.ndss.com.au/cgm](http://www.ndss.com.au/cgm)

### WHY DO I NEED CGM?

Our current pump requires CGM to give you full system functionality. Medtronic are committed to advancing this technology and all future generations of Medtronic diabetes therapies will need compatible CGM to realise the benefits. (The transmitter and sensors are sold separately because insulin pumps may be covered by private health insurance).

### PROTECTING YOU TO STAY IN TARGET

The MiniMed 640G System<sup>1</sup> keeps you in target range with custom basal profiles and an in-built bolus wizard.

## AGED SEVEN TO TWENTY AND CAN ACCESS THE NDSS CGM INITIAIVE? ( CONT'D.)

## CURRENT MEDTRONIC CGM SUBSCRIBER?

### WHAT ARE THE COSTS?

Once you have met with your Diabetes Educator you can apply for fully subsidised CGM via the NDSS. Please make sure you ask for the Medtronic starter kit that includes the G2 Transmitter and Enlite Sensors.

- To access the Tech Upgrade CGM subscription your child needs to turn seven before the subscription ends.
- You need to send us both your proof of health insurance covering IPT plus a photo of a receipt showing you collected a box of Enlite sensors from a pharmacy within the last six weeks.
- As well as accessing the NDSS subsidy you will need to subscribe to the Tech Upgrade CGM Plan for one year via our eshop.
- We will charge your credit card \$200 every other month.

### STYLE YOUR PUMP

THREE 'LENNY THE LION' COVERS  
PLUS THREE ADDITIONAL COLOURS

- Each time your card is charged we will also ship you a different colour Silicon pump cover to fit the 600 series of pumps- so you will get six covers in total -one for each payment.
- All future tech upgrades will require the use of Medtronic CGM technology - just as the MiniMed 640G does today.
- Your subscription is for the period of a year. You will receive the Tech Upgrade within six months of the end date, providing the technology is available in Australia.
- Terms and conditions apply

We really appreciate your loyalty so we want to reward you. We've created a Tech Upgrade CGM Subscription just for you- at a reduced rate of \$300 per month. We first need to cancel your current CGM subscription, once this is complete you can purchase a Tech upgrade CGM Subscription.

- If you are already on a 12 month subscription it will mean that by spending just \$50 extra per month you will be able to access our Technology Upgrade once it is available in Australia.
- If not currently on a 12 month subscription you can also cancel the current one and purchase a Tech upgrade CGM Subscription for \$300/month.
- All future Tech Upgrades will require the use of CGM technology, just as our MiniMed 640G system does today.
- Your subscription is for the period of a year. You will receive the Tech Upgrade within six months of the end date, providing the technology is available in Australia.
- Terms and conditions apply
